-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14,16-18,20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Avitall (6430426).

Re claim 1, col. 4, line 32 teaches that the device of Avital can pierce the atrial septum. Thus, Avitall is considered to teach piercing the atrial wall. Further, it is considered implicit/obvious that the tip of the Avitall device is sharpened; otherwise the tip couldn't pierce the wall of the heart. As taught throughout the patent, the shapeable section of Avitall can be shaped into numerous shapes, depending upon the desire lesion one wants, see col. 6, lines 63+, and col. 4, lines 14+, for example. Still further, the control wires 294,295 shown in figure 22a are considered to be obvious over/analogous to the fixturing means set forth in the claims. That is, any number of shapes for the shapeable section can be achieved via the wires, as shown in figures 22b, 22c and 23, with the device of Avitall in a similar fashion to that of the fixturing means.

Since new art has been applied, this rejection is not made final.

Allowable Subject Matter

3. Claims 15,19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
